

Robert Hume

Work experience 1980 – 1991 Westinghouse Electric Corp. Baltimore, Md.

Senior Radar Engineer

- I worked in a System Development Division at Westinghouse for 11 years. As a group, we were responsible for developing next-generation radar designs that enabled the division to answer proposals and win contracts. Among other things, I was responsible for designing computer simulations to evaluate radar design and performance.

Education 1976 - 1980 The Cooper Union NY., NY

BSEE

- I was director of the student-run Production Center, which was responsible for providing stage lighting, sound and recording of all performances in the Great Hall Theater. There were typically two events scheduled each week, a panel discussion and a musical performance.
- Dean's List 1978

Interests and activities I enjoy playing and recording music and own a small home recording studio. I am an avid woodworker and have a well-equipped workshop. While an at-home parent, I have constructed a 2000 sq. ft. addition to our house. I enjoy playing tennis and I play and travel with an Ultimate Frisbee team. I also have an interest in photography, both color and black and white.

Volunteer experience I play music for children at Mt. Olive Nursery School and Hernwood Elementary School. I substitute for teachers on occasion. I have built an outdoor playground and indoor furniture for the nursery school.

Languages I can embarrass myself in Spanish. I learned to speak it in high school and have vacationed several times in Spain.
